Special Issue on Atheism

Atheists' objections about the Quran.

Atheism is a psychological problem and not a cognitive or rational one. Adopting atheism is not an intellectual or intellectual issue, but selfish desires, psychological problems, trauma etc. are the reasons for it. Before we discuss atheism we need to define it. Atheists describe themselves something like this: "Atheism is not disbelief in gods or denial of gods; it is a lack of belief in God." People who identify as atheists prefer to emphasize their lack of belief rather than deny having faith. Intellectually, they consider atheism better than believing in God.

Abu Al-Ala al-Maari (973 AD ~ 1057 AD), A Syrian Muslim Philosopher and Poet , says that there are only two types of human beings in the world. The first type is those people who have a mind but no religion. In the second category are those people who have religion but no mind.

Let us first discuss some of the basic objections of atheists.

1.. The Qur'an is the self-made word of the Arabs !

Answer :

1..Tell me the names of the Arabs who made the Quran?
2.. How many people they were ?
3.. And what was the tribe and subtribe of these people?
4.. Which region of Arabia did they belong from?
5.. What was the detailed bio data of these intelligent Arab people?
6.. How many Arabs did this holy work?
7.. How much time did they get to make the Quran?

8.. What was the religion of those Arabs who made the Quran at that time?
9.. How did they accept Islam?
10.. They created the Quran under the influence of which people?
11.. What were the occupations of these Arab people?
12.. Did they disappear after this important work?
13.. Did they come from space in a spacecraft or were they born from the earth like plants and trees?

2.. In various verses in the Quran, these gardens are mentioned about 90 times and canals about 40 times. The God of the Quran keeps saying the same thing over and over again.. Strange thing.
"You will enter Gardens of Paradise under which rivers flow"

Answer :

If there were swimming pools or massage parlors in Arab society, the wonderful swimming pools and massage parlors of Paradise would have been introduced in the Qur'an.
If a child has never seen an elephant and his father tells him that if he gets first position in his exam, he will get an elephant as a gift! what will happen ? Because the child has never seen an elephant .. but if his father had offered him a new bicycle, he would have tried to prove that he was worthy of the new bicycle.
Similarly, the Qur'an presents concepts that people knew well.

3.. The Arab region of 14 centuries ago was a barren, desolate and rocky region in which greenery and water were rare. That's why the Arabs were lured and they were shown a dream of gardens and canals in Paradise, the Arabs loved gardens, that's why they were lured to the gardens.
So, as a psychological tactic, the Arabs were lured to heaven with streams of milk.

Answer: The message of the Qur'an was given to the Arabs by the Holy Prophet, so the examples of figs, dates, grapes, honey, milk, pomegranates and olives are described in the Holy Qur'an. Because the Arabs were familiar with these foods and these things have great importance in the Arab society. The Arabs of that time did not know about mango, banana, apple, pineapple, coconut, peach, apricot, so the Quran did not mention these fruits. If buffaloes, deer, ostriches, quails were found in Arabia during this period, then the Quran would have introduced them too. introduced.

Away from senses and intellect.. My atheist friends, what is the name of Human Ecology?
In the Arabia of this period, if the fruits of the Mediterranean and European region like Avocado, Nectarines, Pieria Kiwi, Blueberries etc. were talked about, then no one can estimate the taste, aroma and pleasure of these fruits. The majority of the Arabs of that time did not eat these fruits because they were not local fruits of the Arabs.

4.. When the people of the Arab desert took honey from the bushes and ate it with passion, they (crafters of Quran) also made canals of honey in heaven because of their choice.

Answer: Were mangoes and lemon pickles found in the bushes of Arabia? Which Arabs take off and eat? Or pizza was found in the bushes of Arabia? If this were the case, then there would be mountains of mango and lemon pickles and pizza in heaven.

Conclusion:

Many of my friends and readers criticized me that i never mention conclusions on my writings , here is a conclusion by demand of this article ,

“ I feel sorry for the psychotic atheists. I pray for him that they will get rid of this frivolous psychosis of atheism very soon or they will spend their last life in a mental hospital”.

Islamic History ,
Bride of Orientalism or Witch of Atheism ?

“First of all, the intellect declines.
Then whatever comes up
It is the expression of that decline of intellect.”

Earlier I wanted to discuss Islamic History regarding Atheism but I combined Orientalism with Atheism because of Atheism & Orientalism are Two sides of a same picture.I consider Atheism as a Witch and Orientalism as the Murder of History.The witch of atheism is thousands of years old, now the witch of atheism comes in a new form as a new bride and tempts the hearts of the young as well as the oldies too.

In the West, the atrocities of the Church , Monarchy and the Papacy's intransigence in all matters led to atheism, when free writers and philosophers in the West wrote against the Papacy. Philosophers thought that if they denied God then they used to get away from the papacy and the monarchy because the papacy had given the king the status of divine shadow of God.
A lot was written in the West against the atrocities of the Church, Monarchy and Papacy, due to which the movement of atheism continued to grow stronger. For centuries, this movement of atheism was limited to the West. But after the Soviet revolution, along with communism and socialism, atheism also came to Asia.

This indigenous atheism targeted the Pakistani educated people who were affected by sectarianism and disgusted with sects.

In order to understand the atheism that is spreading in the Indian subcontinent, especially in Pakistan, one has to first understand the mental, social, economic, educational and religious trends of the sub-continent.
United India was a land where many seditions arose, Mughal Emperor Akbar's Deen Elahi, Shia religion of Amroha, Lucknow and Rampur, Barilaviya, Deobandia, Salafiyya, Qadianiyyah etc. Millions of Sufis, dozens of Mujaddids very much far from the intellect, Mahdi type people became famous and simple people followed them. Hundreds of funny creatures like Alaah Hazrat , Qudisa Sirahu , Sheikh Al-Hadith and Fazilah al-Sheikh, Manazir e Azam, Zakir Ahl al-Bayt, Siraj al-Mujtahidin, and Mufti e Azam are found in this region. The Barelvi Madhhab of UP, the Deobandi Madhhab of UP and Delhi, the Ahle Hadith Madhhab of Punjab and Delhi, the Shia Madhhab of Amroha, Lucknow and Rampur, the Qadiani Madhhab of Gurdaspur and Ludhiana, all were more than imams of mischief and ignorance.

In united India in the 19th century, the East India Company provided financial aid of millions of pounds to the Deobandi, Barelvi, Ahle Hadith and Qadyani sects. Shi'ism was on the rise due to the antics of the princes and nawabs of so-called muslim princely states. When the East India Company was dissolved on June 1, 1874, the British government's financial support to these evil sectarians continued and continues to this day.

The political situation after the partition of India in 1947 is not our subject, the religious sectarian conflict was also rising parallel to the political conflict in India and Pakistan.After 1970,in Pakistan, due to various reasons, a religion-averse class was born in which the majority of the educated religion-averse people of that era were. In the same period, Urdu translations of the books of Western authors and novels of Russian authors came into the hands of this educated class. The Soviet Union imitated British policy. Piles of Soviet Currency Rubles were piled up, let alone the big cities, even the various study circles in the towns were full. (Remember

that during the 1970s~1980s, a Ruble was worth three to five dollars, as possession of foreign currency, especially dollars, was a serious crime in the Soviet Union, and the US needed large quantities of Rubles for his agents in the Soviet Union.That's why America was buying rubles at exorbitant prices,as well as the Russian lobby in Pakistan and India earned a lot of dollars in exchange for Rubles). Communism and socialism were at their peak in colleges and universities. Translations of Russian books as well as translations of Western philosophy books also began to be found at the cost of shilling; philosophy and atheism coexisted at that time. Thus, the thousand-year-old witch of atheism wore a new make-up and disguised herself as a bride of philosophy and entered the bridal rooms of Muslims.
My topic at this time is atheism entering Pakistan.This indigenous atheism targeted the Pakistani educated people who were affected by sectarianism and disgusted with sects.

What is common in Orientalism and Atheism ?

Orientalism is derived from the Latin word oriens, meaning "east" (literally, rising sun). It is the opposite of Occident. It simply meant "east" or "eastern".
We can say that Orientalism refers to Western ideas about the East (Middle East ,South Asia ,Central Asia and Southeast Asia) as either realistic or hypothetical. And atheism is basically the philosophy of denying the existence of Allah.
The common thing is in modern-day Orientalism and atheism regarding Islam is a kind of hypothetical Orientalism and atheism, which is based on the fake, fabricated and immoral hadiths and shameful traditions of the so-called Muslim Muhaddithins, historians, scholars, and jurists.

Unfortunately, all the stories about Islam have been based on these supposed historical events and fabricated ,false hadiths. The common people are too gullible, even the educated people, to believe those stories created by Idols of history. Even those who consider themselves educated surprisingly never use their intelligence well in the affairs of Islam. Let them talk about the politics of the whole world 365 days a year. If someone heard

their talks ,It looks like The CIA learns from Pakistanis, MI6, Mossad, RAW, GIP (Saudi Intelligence), BND (German Intelligence) and KGB, to make their policies by asking Pakistanis Intelligentsias .
But when it comes to Islam,Pakistani world famous intellectuals become senseless duffers the same as Donkeys !

A very loud voice against Orientalism:

When talking about Orientalism, the first mention should be the late Abul Hassan Nadwi (1913~1999) in the Subcontinent . Abul Hassan Nadwi is recognized as the most powerful voice among the critics of Orientalism in the 20th century. He frequently wrote in great detail about Orientalism and Orientalists. But surprisingly,he ever remained silent on the matter of where did the Orientalists get the material to criticize Islam, the Holy Quran, the Holy Prophet and the Companions of the Prophet? And where do the sticks of criticism of Orientalists meet?
I am sorry to say and at the same time sad to tell you that
Abul Hasan Nadvi's talks and writings come in the category of verbosity, eloquence, and abundance of words !

My question is, where do Orientalists and Atheists get their stories for their boasting???
No one discusses it.. Why.. Nor does anyone explain the reasons why Orientalists and atheists criticize Islam. Where do Orientalists and atheists find the basis of criticism about Islam ?
A senseless person in Islamic History named Shibli Noumani , Shibli Nomani's book "Al-Farooq", in this book, Shibli Nomani has accused Ameerul Momineen Umar bin Khattab (RA) of threatening to burn the door of the house of Bibi Fatima al-Zahra, the daughter of the Prophet (PBUH). .
See page number 66. Al-Farooq..
Shibli Nomani's intellect was grazing somewhere?
It is unfortunate for the Muslims of the subcontinent that Muslim history was narrated by such stupid and insensitive people.

Apart from the work of Sir Syed Ahmad Khan at the end of the nineteenth century, we have been criticizing Orientalists and atheists for the past hundred years, but the reasons for the criticism of Orientalists and atheists about Islam, the Holy Qur'an, the Holy Prophet and the Companions Not ready to know.
The strange behavior of modern religious Scholars and intellectuals is uprising from Islam ,Not only in the subcontinent but also in the Arab world, our modern religious scholars have written hundreds of books and thousands of articles about Orientalism and Atheism, but they deliberately never discuss the reasons for the criticism of Islam by Orientalists and Atheists.
Are forced or are mental slaves or have intellectual disability.. I think all the reasons.

We get a lot of complaints about Orientalist and Atheist books from our religious compartments, Such are the complaints of our Muslim religious writers and intellectuals. For example, Orientalists and atheists have written this and that in their books, etc. In fact, the attitude of our religious writers and intellectuals towards Orientalists, atheists, and atheism is very childish. We consider everything to be a conspiracy of Jews and Christians.

"Judeo-Christian conspiracy theories" have been the favorite mental fodder of Muslims for centuries. Actually we want to say that we Muslims are completely innocent and immature cows. And the rest are cunning, conspirators, deceivers. I laugh at the mental attitude of our Muslim scholars and intellectuals.

Orientalism and Atheism about Islam are taken from so-called Islamic history books, collections of hadiths and fiqh, etc. Books about Islamic history are based on oral stories. I would like to give two examples, Like "Mr. Zaid said, I heard from Mr. Dawood and Mr. Dawood said that he heard from a person. He met him at a fair while many people gathered around the narrator who told the story. He used to listen to very interesting stories for hours and the storyteller is from Kufa.

The Another example is that "Mr.Bukhari reported that i heard from a person during travel named Abu Zarha,he listened from Ibn e Salma, told, he listened from Mr. Zuhri , and Zuhri said that I heard from Ubaid bin Sabaq..

Due to lack of time and research workload and professional obligations, I have only been able to read more than two dozen books and dozens of articles by the critics of Orientalism and atheism, but I have found almost identical arguments in different variations. All these dialogues are repeated over and over and over again and anyone will get bored reading almost the same repetitive dialogues. All the discussions are almost the same but written differently in the narrative.
The ingredients of the tablet are the same and the taste is bitter but the colors are different.

My full & final comment is that when you keep all kinds of gossips, all kinds of dubious history, fake hadiths, shameful stories close to your chest for 1400 years, and these fake and fabricated stories and narrates loudly on a daily basis and declares them as the basis of religion, then people will definitely talk about these stories.
The so-called Muslim historians, muhadiths, scholars, commentators have narrated dubious history, fake hadiths, and fake heinous stories of war between the Companions. All these fake and fabricated traditions among Muslims are the main means of spreading sectarianism, whether it is Shia or Sunni, both rioters have actively contributed in this process of spreading sectarianism is continuing with vigor. These historians, muhadiths, commentators and so-called scholars created various misgivings and doubts about Islam in their books.These historians,muhadiths, commentators and so-called scholars deliberately targeted The Qur'an and the Holy Prophet (PBUH) by defame, slander and criticism. Our historians of the present and past centuries have only one job to do to quote the fabricated stories of the Khorasani Magins ,Yemeni Jews, seditious Iraqi and Iranian only.

From whom did the Orientalists and atheists take oral traditions and play their own duffle.

All critics of the Orientalists and atheists in their books and treatises repeat after every page certain trending phrases "Jews and Christians conspiracies against Islam", "Jews and Christians conspiracies against Islam". No one has asked these critics of Orientalists and atheists that sir, all these people who fabricated these oral stories without proof under the title of Islamic history and hadith of the Prophet, why did you accept their assumptions and fabricated stories? Are there any problems? Pick up and throw the assumptions and fabricated stories into the garbage or gutter.. And should jointly announce that Muslims have nothing to do with these so-called Islamic history, fabricated stories and fake traditions.
Game over, money digested, devil upset.

I would like to discuss only a few of these figures who are considered by Orientalists and atheists to be the "pillars of Islamic history".
Let us know about some "precious diamonds" of Orientalists and Atheists, based on whose stories, Orientalists and Atheists wasted their lives in useless stories.

I start this part to quote an idiom for my poor indigenous Atheists..

“The Camel, desiring to have horns ,lost even his ears.”

Stories of Orientalists and Atheists are based on oral and hypothetical traditions of Ibn Ishaq (85 AH ~ 150 AH), Al-Waqdi (130 AH ~ 207 AH), Ibn Hisham (died 218 AH), Ibn Saad (168 AH ~ 230 AH), Ibn Jarir Tabari (224 AH ~ 310 AH), Ibn Shahab Zahri (58 AH ~ 124 AH) etc.

Ibn Ishaq (85 AH ~ 150 AH), Muhammad bin Ishaq bin Yasar bin Khayar. Ibn Ishaq is the oldest biographer of the 8th century(2nd Century of Hijra).Ibn Ishaq's grandfather Yasar was brought to Madinah as a prisoner of war in 12 Hijri, Ibn Ishaq's father and two uncles' hobby and profession

was "storytelling", Ibn Ishaq also adopted the same profession. He rose to prominence when he became a disciple of Ibn Shihab Zuhri and became a top class storyteller in Madinah. whose famous book is known as ***"Sirat Ibn Ishaq".*** This book is now extinct but the prose part of this book is taken in "Sirat Ibn Hisham". Known for his uncanny ability to verbalize history without proof, his traditions are considered the oldest flower bouquet of so-called Islamic history.

Ibn Hisham (d. 218 AH), Abd al-Malik Ibn Hisham al-Hamiri (d. 218 AH), known as "Ibn Hisham", was a famous Muslim historian who was born in Basra and died in Fustat ,Egypt. His family belonged to the Banu Ma'afar tribe of Yemen. He was a famous storyteller and used to tell historical stories. . He compiled the biography of the Holy Prophet (PBUH) which is popularly known as the biography of Ibn Hisham. He compiled this book with the help of Ibn Ishaq's student Ziyad al-Baqaini (died 183) from the book Al-Maghazi wa al-Sair. It is said that Ibn Hisham's age at the time of his death was 126 years, according to this calculation, Ibn Hisham was born in 92 Hijri.
Ibn Hisham said that he compiled his "Biography of Ibn Hisham" by listening to Ibn Ishaq's student Ziyad al-Baqa'i, who mostly lived in Kufa.

But no one knows the details about this person Ziyad al-Baqai (died 183).
Later Ibn Hishām's *As-Sira* was chiefly transmitted by his pupil Ahmed bin Muhammed bin Khalid al-Barqi Known as Ibn al-Barqi, the author of the Twelver Shia's Hadith Book " Al Mahasin ".

Al-Waqdi (130 AH ~ 207 AH) Muhammad bin Umar bin Waqdi (130 AH ~ 207 AH) known as "Al-Waqdi" was a freed slave of the Banu Aslam of Medina. Al-Waqdi is mainly known for his book "Al-Tarikh wa Al-Maghazi". , which is the only part of his work that has been preserved in its entirety, but all of al-Waqdi's narrations are oral narratives.
Al-Waqidi freely fabricated hadiths including history and narrated hundreds of fake hadiths in Baghdad as a Muhaddith and thousands of people in Baghdad listened to him with pleasure and enjoyed these 'fantasies' of fake

stories. I have told many times that in the last half of the first century of Hijri and in the second and third centuries of Hijri, Baghdad, Kufa, Khorasan, Syria etc. were the centers of fabrication of fake hadiths and events.
Thousands of liars were busy day and night in fabricating and narrating these traditions and millions of fools were busy listening to them with pleasure. What will be the scenes these days.. ! Waqidi is famous among the scholars of that time as " Kazzab" The Liar.

Muhammad Ibn Sa'ad (168 AH ~ 230 AH), known as Ibn Sa'ad, spent several decades with al-Waqdi and wrote traditions of Waqdi, hence Ibn Sa'ad's nickname "Katib al-Waqdi" The Clerk of Waqidi. He became famous for the compilation of Tabaqat Ibn Saad known as "Tabakat al-Kabeer". This book mentions the important personalities from the time of the Holy Prophet (peace and blessings of Allah be upon him) to the time of the Companions (may Allah be pleased with him) and the followers and it has been used by every new historian.I consider Ibn Sa'ad as the earliest "Copy-Paster" of So-called Islamic History.
This is the reason why every historian for more than a thousand years has used Ibn Sa'ad's traditions as references in their compilations but did not use their intellect at all.

Muhammad Ibn Jarir Ibn Yazid al-Tabari (224 AH~310 AH) known as Ibn Jarir Al-Tabari, was an Iranian historian from Amul, Tabaristan, Northern Iran. Among his most influential and famous works are his Quranic commentary, known as Tafsir al-Tabari, and his historical book Tarikh al-Rasul wa al-Muluk, often called Tarikh al-Tabari.
Ibn Jarir al-Tabari narrates the fake and false history of the wars between the companions of the Prophet (may Allah be pleased with him) in the name of Jumal, Sifan without any evidence. Ibn Jarir al-Tabari narrated the stories of Karbala, Muawiya and Yazid etc. through doubtful oral sources. That's why Ibn Jarir al-Tabari became the favorite of Orientalists and atheists.

In the preface of Tarikh al-Rasul wa al-Muluk, it is written in the beginning that there is no eyewitness to all the events described in it and all these things have been written after hearing from people. Al-Tabari declared ,
“In what I have mentioned in this book, my trust has been on my reports and narrations of the narrators and not on the results of intellect and thought. If it seems incomprehensible and unacceptable that none of it fits him and does not make any sense, then he should know that I have not written all these on my own behalf, but I have forwarded it in the same way as what has reached me from others".
(Tarikh Al-Tabari, Volume I, Page 17)
Tabari's stories have been regarded as "divine revelations" by sectarians, orientalists and atheists for centuries. Now in 2024 AD the indigenous Pakistani Atheists are very fond of the stories of Tabari as their divine book as well.

After Tabari, all historians have followed his footsteps. Khalifa bin Khayat, Ibn Qutiba Dinuri, Yaqubi, Bilazari, Khatib Baghdadi, Abul Fazl Bayhaqi, Ibn Juzi, Ibn Khalqan, Ibn Nadeem, Ibn Kathir, Jalaluddin Suyuti, Ibn Khaldun, Akbar Shah Khan Najibabadi, Shibli Nomani, Safiur Rahman Mubarakpuri. Be that as it may, all historians are following his footsteps.

Almost all Muslim historians of the last century tell stories in their so-called history books “Tabari wrote this”, Waqidi wrote this”, “Masudi wrote this” “Zuhri says this” “Ibn Nadeem says this”, “ Ibn Khaldun said this". etc.

I want to ask how long Muslims will suffer with that demon’s intelect !

Ibn Shahab Zuhri (58 ~ 124 AH) :

A very famous figure of Muslim history Ibn Shahab Zuhri known as historian and muhaddith, he is the darling of western atheists and orientalists. Zahri is a super-duper master craftsman of fake traditions (history and hadiths), he fabricated hundreds of stories about Revelation, Jama al-Qur'an, Holy Prophet (PBUH) and Companions (RA).

He is a Syrian but because of the name Zuhri, he is considered a Madani, although He is not a Zahri. His grandfather had accepted Islam at the hands of a Banu Zuhra's preacher, and a person who converted to Islam at the hands of a Banu Zuhra was respectfully called a Zuhri.

"Banu Zahra" is a sub-branch of Quraysh tribe,the holy mother of Rasool e Kareem, Bibi Amna bint Wahib belongs to Banu Zahra. Saad bin Abi Waqqas (RA) and Abd al-Rahman bin Auwf (RA) are also from Banu Zuhra.

Zuhri narrated such traditions that even Imam Malik, a disciple of Zuhri, was deceived by chains in which Zuhri narrated from Urwa bin Al-Zubayr. , from Aisha. On the authority of Hamza bin Abd Allah bin Umar, on the authority of Ibn Umar, on the authority of Abi Salamah, on the authority of Abi Hurairah. Imam Malik was basically a simple person, he used to go out of Madinah only for Hajj, he could not understand the fraud of his Syrian teacher Ibn Shihab Zuhri, then Zuhri had also prepared a lot of Chains such as "An Saeed Ibn Al Musayyib~ Abi Hurayrah, on the authority of Ubayd Allah bin Abdulah`~Ibn Abbas, on the authority of Urwah bin Al-Zubayr~ Aisha. On the authority of Hamzah bin Abdullah bin Umar ~ Ibin Umar, on the authority of Abi Salmah~ Abi Hurairah, but to object to these chains of narrators was also a big heart job and my heart and kidneys are stronger than Imam Malik, that's why i am talking about this topic.

In addition to fabricating chains of narrators, Zuhri also invented many narrators, among which "Ubayd bin Sabaq" is the top one. In the name of Ubayd bin Sabaq Zuhri created the story of the collection of the Holy Quran and Bukhari took this story. All real and indigenous atheists and orientalists started dancing on this "false story of Jama al-Qur'an". The real atheists and orientalists were Jews and Christians, so they became anti-Islamic,but the indigenous atheists made an unsuccessful attempt to spread their indigenous waste by eating the waste of the real atheists and orientalists as foodies. The indigenous Atheists have nothing to say about something new but they only followed the footprints of Jews and Christian atheists expressed their malice about the twisted traditions of the Khorasani Magi,

Yemeni Jews, seditious Iraqi and Iranian subjugators and subservient subjugators.
My last words for Ibn Shihab Zuhri " After the birth of Ibn Shihab al-Zuhri, Satan left the world because Satan thought that people would not need him after Ibn Shihab al-Zuhri."

"The modern-day Orientalism and atheism regarding Islam is a kind of hypothetical Orientalism and atheism, which is totally based on the fake, fabricated and immoral hadiths and shameful traditions of the so-called Muslim Muhaddithins, historians, scholars, and jurists."

Just one question for atheists..?

Who is the architect of the universe?

The Sun has been moving continuously on a fixed path in space for the past 5 billion years at a speed of 6840 km per hour. At the same time, its family, 9 planets, 146 moons and 10 lakh meteorites are moving at the same speed. It has never happened that someone went to the chase by mistake or something happened by mistake. All are going their own way according to their given agenda.
Even now, if there are words, but there is no one who runs, there is a design, but not a designer, there is a law, but there is no enforcer of the law. There is control, but not the controller, it's all an accident, an explosion (big bang). What will you say?

The moon stirs the trillions of tons of ocean water three hundred and seventy thousand miles away from the island twice a day to provide the right amount of air for the creatures that inhabit them. Oxygen is being administered, the water is becoming clearer, Taifan is not born in this. The coastal areas are being cleaned and the wastes are washed into the deep water and become food for the creatures living in deep sea waters.

No, but sea water is consumed in a certain amount. For at least three billion years, a suitable balance has been maintained so that small and large aquatic animals can easily swim in it. They have brackish and freshwater streams. There are also freshwater oceans below the surface that are mixed with open freshwater oceans. There is a curtain between them all so that fresh water remains fresh and salt water remains fresh.

What is the logic behind this surprising system? Who maintains this aquatic balance?

Did theOceans have its own thoughts or the moon's own decision?

Who teaches the newborn baby to cry and draw the mother's attention when he/she is hungry? Who motivates the mother to save the child in the face of every danger? Who gave this courage ? Chickens start walking when they come out of the egg, animals cling to milk without learning, who teaches them all this?

Who among the birds loves to bring food in its beak and put it in the mouth of its child?

Where did they learn these manners of life ?

The honey bees collected flower juices in a jar like storage in their bodies by sucking the juice from each flower in the far drawer garden. Every one of them, like expert scientists, knows that the nectar of flowers that are poisonous are not to be ingested ,like a competent engineer honey bees also knows the art of separating honey and wax. When it's hot, they cool the honey with their wings running like a fan to prevent it from melting, and make a house of wax that even the greatest architects are surprised to see. In each one there is such a spiritual system that they go far but do not forget their way home. Who taught them this way of life?

Who gave them this intellect ?

The spider makes such a web to catch its prey with its mouthparts that even modern textile Waivers are unable to create such a sophisticated web.

House ants store food for winter in summer,and before rainy seasons as well ,build homes for their young, live in an organization where all management principles are surprisingly corporate.

Fish living in cold water lay their eggs thousands of miles away from their home in warm water, but the babies that come out of them are young and want to live in their own home in cold waters .They reach by themselves.

The life cycle of plants is no less fascinating. How do germs and bacteria manage to survive?

Who taught them about life?

Who taught them these principles of social management?

Is the earth so wise that it itself established the system of day and night, by itself on its axis ,so that the seasons change throughout the year, sometimes spring, sometimes fall , sometimes Cold and sometimes dry so that the people who live on it can get vegetables, fruits and food all year round.

Did the earth itself establish a strong north-south magnetic system within itself?

Due to this effect, the electricity in the clouds turns the nitrogen in the air into nitrous oxide (Nitrous Oxide) and prepares natural fertilizers for the plants on the land through the rain. Submarines and the planes find their way with the help of this magnetism, the deadly rays from the sky collide with this magnetism and turn back so that the earthly creatures are protected from their deadly effects And life goes on.

The earth, the sun, the air, and the sea have combined together so that the water vapors from the sun's heat rise, and the air lifts up the water And brings to the field, the radio waves from the stars. Collect the water in the wind and form a funnel and then use the rain to irrigate the dry field by making the water soft.

When water needs are less in winter, it accumulates in the form of snow deposits on the mountains. In summer, when more water is needed, it melts and flows back to the sea in the form of rivers, irrigating the plains.

A wonderfully balanced system that irrigates everything and nothing goes to waste.

Did the galaxies ,solar system ,stars, air and earth think about each other?

Who will give the answers ?

Our Pancreas does not increase a certain amount of sugar in the blood, the heart pump continues to pump blood with a regular movement every minute, approximately two and a half billion times in a 65-year life without repair.If any Organ starts misconduct ,life will behave difficult.

Our kidneys are unique and amazing cleaning factories that know how to keep the components in the blood that are useful for the body and add

them to the purified blood system after cleaning and throwing out the wastes. .

In the stomach, the chemical complex (Chemical Complex) is added to the food, there is a complete intestinal system that separates life-giving components such as protein, carbohydrates, etc. from the food and passes it onto the blood Get the hell out is given

These masterpieces of engineering in the human body, this unique specimen of science, this amazing factory in the small stomach, did they all become ones ? as the result of the Big Bang !

Who created the brain? Enclosed in the shell of solid bone, it floats in the water, a treasure of intelligence, a store of information, a center of commands, a source of communication between man and his environment, such a supercomputer that man is Still don't understand navigation and design It has been found that, despite millions of efforts, no supercomputer built by human hands and minds can reach its tenths.

Who is the creator of this mind?

Every human being is a collection of cells. So small they don't come without the aid of a microscope, but they all know what to do. Every cell of a human being has consciousness and is a complete personality in its own existence. Our entire programming is written in these genes and life moves automatically according to this program. The whole plan of our life, our personality, our intelligence, our purpose, everything has already been written on these cells.

Whose programming is this?

Inside the seeds of plants is their entire blueprint, whose blueprint is it?

A cell, which is difficult to see even with a microscope, becomes a strong, intelligent and intelligent human being. Whose creation is this?

Are these systems the side effects of a huge explosion..?

The World of Atheists .. The World of Coincidences

I told so many times that the
world of Atheist starts with coincidences
and ends with Coincidences ..

The Oceans have always played a very important role in human life, rain, food, trade, travel etc have been indebted to the sea. In addition to fulfilling all his needs from the sea, man also used the sea for evil deeds like enslaving people, land grabbing, bloodshed and wars.

Is the ocean system just a coincidence?

When we ask anthropologists why water systems exist only on our Earth, they answer that ,

Is this a coincidence?

While water is very important for life. What would happen if there was no water ?

Evolutionary scientists and anthropologists answer that nothing survives.

Now a child of primary classes knows that since water is very important for human life,we spend water from our outer body in the form of a bath, we also spend water from our inner body, like all of us. Do you know that there is a small water cycle of water, the sun rays fire on the sea, then the sea water becomes vapors, then the vapors accumulates in clouds, then the winds drive the clouds, then they fall on the land in the same way, then the rain water goes to the oceans indirectly. This was a small water cycle..We ask the atheists, where did this water come from?

Evolutionary atheists say that it is a coincidence.

Is this a coincidence or an endless long series of events? Let's take a look at this long series of coincidences, you will decide for yourself whether it is just a coincidence or a proof of the existence of a great designer who wants human life at all.

I ask atheists why sea water is salty ?

Answer of the atheists: It is the salt that flowed from the mountains into the sea, it made the water salty.

A very childish answer to a very important question.. Since when did the water flowing from the mountains become salty? The water flowing from the mountains first passes through the rivers and canals and fulfills human needs for thousands of years, irrigates the crops in the fields, the animals, whether domestic or wild, are getting fed by this water, if this water is salty. If it were, crops would be destroyed in the fields, domesticated and wild animals would die from drinking this water.

Is this answer satisfactory? The question doesn't mean ***'how'*** but the question is ***'why'*** . It was based on Let's make this question a little ugly for atheists. What would happen if the Ocean water was not salty?

The reason is that such a large reservoir of fresh water in the form of the sea cannot be preserved under the open sky for a long time. It will become a threat to life. You should understand that there is 361 million square kilometers of ocean in this world. That is, one part of the earth is dry and three parts is water. And if all this water becomes foul, it will cover the whole earth.

Now here is a long chain of coincidences .

Presence of Ocean water on earth? coincidence

Saltiness of Ocean water? coincidence

Creating waves in Oceans? coincidence

Then separate this salty water from the salt and make it transparent through the clouds and rain it on mankind as drinking water ,fresh water for Crops,Rivers,Canals as well as to establish underground water consumption balance ? Coincidence ..!

Do you agree with all these coincidences?

Of course, every sensible person will consider that these events cannot be coincidence but there is indeed a designer behind this system.

Holy Brains of Muslim Priests and Muhadiths

I do not understand what kind of people these historians and hadith scholars were, that no one can attribute such things to their ancestors as they attribute to the Holy Prophet and his Companions. In the minds of the sectarian priests and Muhadiths,I thought that donkey dung is full of their holy brains.

Muslims have been carrying such baggage of shameful stories of muhadiths and historians for centuries, in which sometimes the Prophet married a 40-year-old woman when the Holy Prophet was 25 years old, sometimes he married a nine-year-old girl. It is done from when the Holy Prophet was 53 years old, sometimes after hearing the stories of beauty of a woman who came as a prisoner of war during a war, he was forced to marry this beautiful prisoner of war woman. Sometimes they are asking the Holy Prophet to give permission for the unclean things like Mutah, and sometimes they are banning this humiliating sacred work of Mutah.

In the stories fabricated by Satanic magis and Yemeni Jews brought the Holy Prophet to the Jew Waraqa bin Nawfal to confirm the revelation. In spite of this, they seem to be puzzled about writing something more from the Holy Prophet. After all, who were these people who had no knowledge of the great responsibilities of Prophethood, nor did they understand the position of Prophethood, from where it was imported? These hadith collectors and historians with low intelligence, low capacity and evil creatures? There was no shame and modesty among the Khorasani Magi and Yemeni Jews but where did all these sectarians sell the shame and modesty of Dev's servants, Barelvi colorists and Selfi King Salafis? What did the conniving Khorasani magians and yemeni Jews have to do with Islam, but they had ridiculous titles like Tablighi King Kong Chaskebaz, Tharki Sheikh Al-Hadith, Sheikh al-Tafaseer, Shaykh al-Arab and al-Ajam

while narrating the stories of the physical beauty of the physical downsides of the hoors who became contractors of Islam. Why are the sesensless donkeys and their ignorant imitators so attached to the sayings of Khorasani Magians and Yemeni Jews ?

Even those who call themselves educated, I am surprised that they use their common sense in the affairs of world politics. Make nonsense discussions on the politics of the whole world 365 days a year.Their discussions seem that CIA, MI 6, Mossad, RAW, KGB etc make their policies by asking these Pakistani hyper geniuses.
But when it comes to Islam, the all Pakistani hyper geniuses became Dumb, deaf, bereft of reason and intellect. Apart from these ridiculous myths fabricated by the Khurasani Magi, the Yemeni Jews, only "Baba Ji's Urine bag" remains with the poor indigenous atheists known as "Creatures of Paradise " As i earlier named them “ Creatures of Paradise”.

“The witch of atheism is thousands of years old, the witch of atheism comes in a new form almost every hundred years as a new bride and tempts the hearts of the young as well as the oldies too.”

The story of Thaqifah Bani Sa'idah

In a gathering, a gentleman had asked a question about "Thaqifah Bani Sa'idah ", a great story of Islamic history, to which I had given this answer.

Answer: First of all, understand that this story is a sample of Ibn Shahab Zuhri's art of fabricating traditions.
The story of Thaqifah Bani Sa'idah is a total lie, this story has been narrated by liars and narrators like Ibn Shihab Zuhri, Tabari, Ibn Hisham, Ya'qubi, Ibn Athir, Ibn Qutiba, in addition to this by liars like Al-Waqdi and Abi Mikhnaf. Iranian writers repeatedly used this false story in spite of the Companions of the Prophet, then the Western Orientalists and atheists tried to discredit Islam and the Companions of the Prophet by referring to the books of these liars.

It was questioned about the tradition of magic(Sahar) on the Holy Prophet, and the story of marriage of Rasool e kareem with Aisha bint Abu Bakr.

I Replied :

First of all, understand that any tradition attributed to Umm al-Momineen Aisha Siddiqa was not confirmed by her nephew Qasim bin Muhammad bin Abi Bakr, that tradition would not be reliable, that is, if Qasim bin Muhammad did not narrate it, the tradition would be doubtful. Yes, only Urwa bin Zubair or Hisham bin Urwa has no authority and if Ibn Shihab Zuhri or Sufyan Thauri were narrated from Urwa or Hisham, then such a tradition can only be the factory of Satan. Circumstances of Evidence (Darayat), now coming to Darayat, none of the ranks & files of the students of Urwa bin Zubair narrate this tradition, only the Kufi or Basri narrators narrated from Hisham bin Urwa, the son of Urwa, narrate this headless tradition, Hisham. In the last year of his life, 145 Hijri, visited Iraq where he

met so many great "Hadith craftsmen". The birthplace of magical traditions and Marriages of Rasool E Kareem PBUH is Iraq. I consider these headless ,bare feet illogical stories to be the souvenirs of "the land of Babylon and Nineveh".

“ If someone thinks that Allah had given the contract to explain and interpret the revelation to Yemeni Jews, Khorasanis, Magians, Iranians or their Sectarian Vultures, then I think he/She should be allowed to indulge in the same fantasy and fun.”

In order to understand the message of the Holy Quran, we have to obey our intellect to divine revelation.

the message of the Holy Qur'an will be understood, when the intellect is subordinate to the divine revelation, the interpretation of the divine revelation exists within the revelation, the interpretation of the divine revelation cannot be imported from outside. Whenever the interpretation of divine revelation was brought from outside,only mischief, misunderstanding and evil came out of it.

Let us discuss the social circumstances in 2nd century hijri ..
I want to describe the situation in Kufa, where there are thousands of so-called followers like scorpions. Everyone has thousands of traditions and they are narrating these fake traditions freely among the people. Millions of hadiths were traveling around like ping pong. Thousands of listeners (subscribers) are passing on these oral statements without hesitation, no record, no proof without evidence extensively.Sunnis and Shias were spreading their gossip like a game of ping pong. In the mosques, parks, streets, markets, in loud voices “ Qala Qala Rasool Allah” means Holy Prophet PBUH said this ,Said that. It was the atmosphere of Kufa, Basra, Baghdad, etc.
All Muhadditheen were Wanderer "Phirantha Mai" type of creatures, no mother, no father, no wife, no child, no work,no family, only non-stop gossip going on.. just like Ibn Battuta. Just wandering from one place to another.
That was happening in the so-called city of Knowledge Kufa but also there were more than a dozen cities where this practice was also going on a regular basis like Basra, Ray, Mosul,Fustat, Bukhara, Nishapur , Tirmiz,San’a etc.

Why am I not an Atheist ?

May be the title will astonished some people but this is a fact indeed when i read the books and articles of Atheists specially Ex-Muslim atheists like Ibn Warraq,Suleman Rushdie,Taslima Nasrin,Ayaan Hirsi Ali , Harris Sultan , Ali A. Rizvi etc ,***as well as a very fresh Atheist whose nickname is "Heraclitus Herac***" , I think this guy is a fan of Ancient Greek Philosopher and Cosmologist of 500 ~600 BC 'Heraclitus'.

I find that the central ideas of their writings are focused and based on fake and fabricated Historical tales and Narrations (called as Hadiths).
As well as, I found the writings of The father of Atheism related to Islam in British India ***William St Clair Tisdall*** were based on fake and fabricated tales taken from so-called History and Hadith books, who is the hero of Indian and Pakistani New Atheists.

First I am discussing ***Ibn Warraq*** (b:1946) . No one knows the actual name of this person because he uses his pen name. It is a name that has been adopted by dissident authors throughout the history of Islam The name refers to the 9th-century skeptical scholar Abu Isa al-Warraq. Warraq adopted the pseudonym in 1995 when he completed his first book, entitled " ***Why I am not a Muslim"*** .He is the author of several books, also including ***The Origins of the Koran*** (1998), ***The Quest for the Historical Muhammad*** (2000), ***What the Koran Really Says*** (2002) and ***Leaving Islam*** (2003). Warraq's commentary on Islam has been criticized by academic specialists in Islamic history as polemical, overly revisionist and lacking in expertise but no one discusses the bases of Ibn Warraq's humorous tales.Ibn Warraq is a fan and follower of William St.clair Tisdall's thoughts .Let us know who is William Tisdill and his tales ?

The fairy tales of William.St.Clair Tisdall ,1859-1928.

William St. Clair Tisdall served as the Secretary of the Church of England's Church Missionary Society in Isfahan Persia (Now Iran) and British India .Tisdall was fluent in several languages like Hindi (Urdu), Gujarati,Persian,Arabic and spent much time researching the sources of Islam and the Qur'an in the original languages.

The main notable works i.e writings and Lectures of Tisdall are

1..The Sources of Islam: A Persian Treatise . 1900

2.. A Manual of the Leading Muhammadan Objections to Christianity.1904

3.. The Original Sources of Quran. 1905

4.. The Religion of the Crescent or Islam: Its Strength, Its Weakness, Its Origin, Its Influence, 1895 ~ 1906 (James Longs Lectures)

His work contains doubtful and fictitious narrations and based on Orally transmitted baseless historical stories by so-called pseudo muslim historians and transmitters.Like other Christian Orientalists,he proved himself as an orthodox Christian who hated Muslims, Quran , Prophet Muhammed PBUH.Christian societies considered his work a sacred mission and published them multiple times.As funds never be a problem for the west for their puppets either local or international.

Unfortunately the Muslims read his literature and its translations without checking the historical stories and traditions,some Muslims read his books and their translations and accepted these fake, fabricated stories,Not only read but also recited without understanding their thousands years old hostility to Muslims.

Just one question for atheists..?

Who is the architect of the universe?Before I start this paragraph ,I gave some jokes of mine to Atheists !

"Suddenly there was a big explosion, many sheets of steel, fiber, aluminum came flying, then automatically connected together, then two engines came flying and fit into the bottom. Tyres came and fitted into the structure, then hundreds of the best comfortable seats came flying in and fitted into the structure, then the structure was best painted, .. thus an airplane was made, .. then the passengers boarded the plane, then the self made airplane started flying automatically .. "

Is it possible?

“There was an explosion, the wheat seeds spread over the already prepared field. Then the plants came out, then the wheat crop was ready, it was harvested by itself, then the wheat was cleaned and filled into sacks, then the wheat sacks were trucked by themselves. I was loaded, then the truck moved by itself and the sacks of wheat were unloaded in the market, then it reached people's houses, there the wheat was crushed by itself and became flour, then bread was prepared from the flour. And the mouths of the people started to become mouth watering.Similarly the curry was also prepared. Vegetables flew from the field and reached the pot, then spices, ghee, salt were added to it and the curry was prepared. Before that, a cow was slaughtered by itself and entered into the pot in beef pieces.”

Is this possible ?

Look at the Circulatory system, Liver, Kidneys, Pancreas,Excretory System, Gastrointestinal system etc are the masterpiece of engineering in the human body, this unique specimen of science, this wonderful factory in the small stomach, did they all become an automatic regimen ?

Who made the brain? Encased in a hard shell, floating in water, it is a treasure of intelligence, a store of information, a center of commands, a source of communication between man and his environment, a computer made by man. No one still doesn't understand its design. It has been found that, despite millions of efforts, no supercomputer built by human hands and minds can reach its tenths. Who is the creator of this Brain? Who will create intellect in the human brain ?

Every human being is a collection of cells. So small they don't come without the aid of a microscope, but they all know what to do. Every cell of a human being has consciousness and is a complete personality in its own existence. Our entire programming is written in these genes and life moves automatically according to this program. The whole plan of our life, our personality, our intelligence, our purpose, everything has already been written on these cells.

Whose programming is this?

Inside the seeds of plants is their entire blueprint,whose blueprint is it?

A cell, which is difficult to see even with a microscope, becomes a strong, intelligent and intelligent human being. Whose creation is this?

Are these systems the side effects of a huge explosion, Big Bang ?

The moon is three hundred and seventy thousand miles away from the islands, twice a day, the moon stirs trillions- trillion of tons of ocean water to provide the right amount of air for the creatures that inhabit them. Oxygen is being administered, the water is becoming clearer. Unpleasant smell is not born in this. The coastal areas are being cleaned and the wastes are washed into the deep water and become food for the creatures living there.

No, but sea water is consumed in a certain amount. For at least three billion years, a suitable balance has been maintained so that large and small aquatic animals can easily swim in it and dispose of their bodies after death. They do not have freshwater or brackish water. There are also

many. There are also freshwater oceans below the surface that are mixed with open freshwater oceans. Between them all there is a curtain so that fresh water remains sweet and salt water remains saltish.

What is the logic behind this surprising system? Who maintains this balance?Was it the Ocean's own thought or the moon's decision?There are too many examples I have but I described only a few.

Conclusion :

All Orientalists and Atheists have nothing to object to Islam, the Qur'an, the Holy Prophet except the fake, fabricated and baseless traditions,tales and stories (Rawayat) narrated by the so-called Muslim storyteller like historians and hadith collectors.Majority of those storytellers and Hadith collectors are Magians, Persians, Khurasanis etc.

That's why a person has some intellect ,how he/she believes in these fake and fabricated baseless stories which were narrated by the blue eyed darlings of Orientalists and Atheists around the globe.

An example of rationalism..

"keep trying"

A young student who was freshly influenced by philosophy and atheism also possessed by the ghost of rationality (be an atheist and don't confuse philosophy and don't want the answer to everything from reason, it just can't be) asked his teacher, "Teacher, God is in our intellect, Never come".

The teacher thought for a while and took his atheist less philosophical rationalist student to the seashore, the teacher had a stick in one hand and a bucket in the other hand. Monsoon was at its peak. The angry waves of the sea were raging to swallow everything on the shore, the teacher took his student and started moving towards the angry waves of the sea, the teacher also had a bucket in his hand.

On reaching the hounding waves ,the teacher told his student "Bring all the water of this sea in this bucket"

At first, the student doubted his hearing and asked the teacher, what should I do with the bucket ? The teacher said, "Bring all the water of the sea in this bucket." The student began to doubt his teacher's mental state and said, "Master, how can all the water of such a vast ocean come in this small bucket ?

The teacher started going back to the beach with his student. After reaching the beach, the teacher kept the bucket aside and took the stick and fell on the student and hugged the student with all his heart to crack down , the student started screaming in pain. After beating his student

brutally the teacher said, " Now I answer your question, Just as the whole ocean cannot fit in this small bucket, how can God come to your intellect? The example of your intellect is like this bucket, limited and only limited... And how can the great creator of the sea be contained in it ?" How can the infinite concept of the creator of this sea come fully into your very limited bucket-like intellect! And on the day you fill the entire ocean in this bucket, that day God will also come to your understanding.”

Teacher also said "keep trying".

A few days later, the same student asked the teacher, teacher, you could have explained this to me comfortably, what was the need for so much beating? The teacher smiled and said, there are two reasons for this, the first reason is that God is remembered in pain and suffering ,when i was beating you, you were shouting so many times “ Oh God save me “ and the second reason is that there is a saying that has been around for hundreds of years

“Ghost of the kicks, don't listen to the talks”

Atheist Claimed that ,
I don’t believe anything , which I can't see.

Who saw Gravity
Who saw Electricity
Who saw Molecules
Who saw Air
Who saw Internet Signals
Who saw Satellite Signal
Who saw Sound Waves
Who saw Atom
Who saw Photons

Theory of Evolution :

Dedicated to the indigenous atheist friends..

Asking questions was only a trick of Kant, Hegel, Nietzsche or Freud?

We also get to question!

As a result of the Big Bang, how did fruits arise?

Why is the color, texture, smell and taste of each fruit different?

What was the obstacle for the fruits to have the same color, texture, aroma and taste?Does the color, texture, aroma and taste of fruits owe to the Big Bang?

If all fruits owe their existence to the Big Bang, why are they not all the same? Did the Big Bang care much about human taste? Did Big Bang have any thoughts of his own?

Don't sell us the theory of evolution.

I wonder that regarding the theory of evaluation, in future the human being evaluated in trees or crops etc.

Conclusion :

Who is the Goddess of Orientalism and Atheism ?

The diabolic book for Orientalists and atheists as Goddess is "Tarikh al-Tabari".
First of all, it is necessary to know that Tarikh al-Tabari is a book of history, Tabari himself has written this in his case.
"In what I have mentioned in this book, I have relied on my reports and the narrations of the narrators and not on the results of intellect and thought. If it seems incomprehensible and unacceptable that none of it fits him and does not make any sense, then he should know that I have not written all this on my own behalf, but what has reached me from others in the same way I have Copied forward".
(Tarikh Al-Tabari, Volume I, Page 17)
Tabari's orally transmitted historical stories have been regarded as "heavenly revelations" by sectarians, orientalists and atheists for centuries.Thus the so-called Islamic history based on Oral fairy tales and fake ,fabricated Hadiths by Magians,Khuransanis,Yemeni Jews,Syrians etc.

The Atheists Delusions,

I want an answer to why, not how !

“The ocean of ignorance cannot be crossed by the stone of argument.”

I would be very surprised if this topic does not bother you.If you have been saved from going mad by reading the thoughts of psychological atheists like Richard Dawkins and your senses are under control, then there is a hope that God is kind to you , Otherwise, his crazy group of four would not have made you mad and made you wander like “sarmad” in the wilderness.

Dawkins tried to toss out the "nullification/ Cancelation" verse in the Quran several times but this poor person does not know that the matter of "nullification/ Cancelation" in the Quran is about the verses of the Torah. People told Dawkins a lot that he should not drink Rare and rare Vodka made from monkey’s urine and potatoes, but Dawkins did not believe that,this Rare Vodka made from monkey’s urine and potatoes goes to the brain very quickly and it gives rise to many delusions.

Dawkins was asked several times the questions of why the children of the same parents are different and Why does the vine that grows from a melon seed have a different taste and smell from the dozens of melons that grow on this vine? But he never replied.

Sometimes i describe an idiomatic story about Atheism ,i want to share this very much amazing story for you ,

A young student who was freshly influenced by philosophy and atheism also possessed by the ghost of rationality (be an atheist and don't confuse philosophy and don't want the answer to everything from reason, it just can't be) asked his teacher, "Teacher, God is in our intellect, Never come".

The teacher thought for a while and took his atheist less philosophical rationalist student to the seashore, the teacher had a stick in one hand and a bucket in the other hand. Monsoon was at its peak. The angry waves of the sea were raging to swallow everything on the shore, the teacher took his student and started moving towards the angry waves of the sea, the teacher also had a bucket in his hand.

On reaching the hounding waves ,the teacher told his student “Bring all the water of this sea in this bucket” , At first, the student doubted his hearing and asked the teacher, "What should I do with the bucket ? The teacher said, "Bring all the water of the sea in this bucket." The student began to doubt his teacher's mental state and said, "Master, how can all the water of such a vast ocean come in this small bucket ?

The teacher started going back to the beach with his student. After reaching the beach, the teacher kept the bucket aside and took the stick and fell on the student and hugged the student with all his heart to crack down , the student started screaming in pain. After beating his student brutally the teacher said, " Now I answer your question, Just as the whole ocean cannot fit in this small bucket, how can God come to your intellect? The example of your intellect is like this bucket, limited and only limited... And how can the great creator of the sea be contained in it ?" How can the infinite concept of the creator of this sea come fully into your very limited bucket-like intellect! And on the day you fill the entire ocean in this bucket, that day God will also come to your understanding.”

Teacher also said "keep trying".

A few days later, the same student asked the teacher, teacher, you could have explained this to me comfortably, what was the need for so much beating ? The teacher smiled and said, there are two reasons for this, the first reason is that God is remembered in pain and suffering ,when i was beating you, you were shouting so many times “ Oh God save me “ and the second reason is that there is a saying that has been around for hundreds of years

“Ghost of the kicks, don't listen to the talks”

In 2019, I want to talk to a Christian Irish professor of Divinity about the Bible. He asked me about my introduction and then said, "Do you believe in the Bible?" My answer was, "I don't believe in the Bible." He smiled and said, "When you don't believe in the Bible, why do you need to question the Bible?"

The Irish professor described a fact in a single sentence, "That which no one believes in and openly declares that he does not believe,So it is not necessary to ask this person questions about this thing. Take this as an example if a lawyer declares in front of a judge in a British Court that, I do not believe in the English Law. Then the judge will give a clear answer that Mr. Lawyer, if you do not believe in the English Law, then you have come to lay eggs in my court ? Likewise when Atheists don't believe in God ,why are they questioning the existence of God ?

When the atheists openly deny God, do they have any psychological problem that they keep giving arguments on the existence or non-existence of God? Why are atheists skeptical?

One of my questions today is why dozens of different generations of human beings came into being through the evolutionary system. One type of race was enough.. Africans, Arabs, white people, Chinese, Asians, Eurasians , there was no need for so many people..One race is enough . Then why were so many races developed?

Look at the Cat’s family , known as The Felidae family have been split into three genera:

- Panthera (cats that roar – lions, tigers, leopards, snow leopards, clouded leopards and jaguars)
- Acinonyx (the Cheetah)
- Felis (all other 'small' cats)

My Question is why there are so many genera of Cat's family ,and what is the need of this huge genera of Cat's family ?

It is to inform you that I am very fond of Nature, I enjoyed hundreds of Documentaries and Movies about Nature. Planet of the Apes , the BlockBuster Movie directed by Franklin James Schaffne ,this first Movie released in 1968 in the USA and in 1971 worldwide , this movie followed by many sequels ,the movie ***Planet of the Apes*** is a 1968 American science fiction film directed by Franklin J. Schaffner and produced by Arthur P. Jacobs from a screenplay by Michael Wilson and Rod Serling, loosely based on the 1963 novel by Pierre Boulle. The film stars Charlton Heston, Roddy McDowall, Kim Hunter, Maurice Evans, James Whitmore, James Daly, and Linda Harrison. In the film, an astronaut crew crash-lands on a strange planet in the distant future. Although the planet appears desolate at first, the surviving crew members stumble upon a society in which apes have evolved into creatures with human-like intelligence and speech.

The writer of " Planet of the Apes" , Pierre Boulle, a french writer Born 1912, in Avignon, France, Pierre Boulle was baptized and raised as a Catholic, although later in life he became an agnostic was admirer of Darwin's theory of Evolution,he was known of his notable novels " The Bridge over the River Kwai" and "Planet of the Apes" .His science-fiction novel *Planet of the Apes*, in which intelligent apes gain mastery over humans, developed into a media franchise spanning over 55 years that includes nine films, two television series, comic books and popular themed merchandise.

The original film series had four sequels:

1..Beneath the Planet of the Apes (1970)

2.. Escape from the Planet of the Apes (1971)

3.. Conquest of the Planet of the Apes (1972)

4.. Battle for the Planet of the Apes (1973)

As well as followed by Television Series

1..*Planet of the Apes* (1974)

2.. *Return to the Planet of the Apes* (animated) (1975)

Remake : *Planet of the Apes* (2001): A re-imagining of the original film.

There are many Reboot Series of this Movie like,

1.. *Rise of the Planet of the Apes* (2011): A series reboot, was released on August 5, 2011, to critical and commercial success. It is the first installment in the new series of films.

2.. *Dawn of the Planet of the Apes* (2014): The second entry in the *Planet of the Apes* reboot series, was released on July 11, 2014.

3.. *War for the Planet of the Apes* (2017): The third film in the reboot series.

4.. *Kingdom of the Planet of the Apes* (2024): The fourth entry in the *Planet of the Apes* reboot series. It was released on May 10, 2024 in USA (Today ,May 16th i am still awaiting the release of this on Youtube ,Netflix or amazon)

You will surely be surprised why I am discussing the Apes Movies in detail but it was considered necessary so that you get an idea of how Darwin's theory was fantasized that Darwin's ancestors would be smarter than humans in the future.. Anyway, these movies are a must watch..

My question is who is the creator of all these monkey species ? And why did so many monkey species need for ?

I want an answer to why, not how ! Simple..

My question in 2016 to Richard Dawkins was this,
The monkey must have done many good deeds, then he became a human being in return for his good deeds, but what sin did the donkey commit that is still a donkey ?

My last words

“I hope and pray to God that Richard Dawkins meets his ancestors, somewhere on Planet of the Apes.”
